course by cisco academy

PROFILE

Motivated B.Tech Computer Science student with a minor in Biotechnology Engineering (BT). Interested in software development, UI/UX design, and database management. Possesses knowledge of programming languages including Python, Java, C, and C++, along with web technologies like HTML, CSS, JavaScript, and basic React, and database concepts using SQL and Supabase with experience in academic projects. Eager to learn new technologies and develop practical skills in the field of computing.

EDUCATION

2024-2028 SAHRDAYA COLLEGE OF
ENGINEERING AND TECHNOLOGY B.Tech
(currently pursuing)

2022-2024

ST RAPHAEL'S CGHSS OLLUR (Higher
Secondary Education) **2022**
ST PAUL'S CEHSS KURIACHIRA
(Secondary Education)

PROJECTS

- **COMPASSION CONNECT** – Java-based web application using React and MongoDB to streamline stray dog reporting, volunteer coordination, and welfare management.
- **MEDITRACK** – Database-driven web application built using Supabase (PostgreSQL) to manage prescriptions, generate medicine schedules, and automate reminders using triggers.
- **KINDKART** – Frontend web application built using HTML, CSS, and JavaScript to facilitate item-based donations, generate personalized digital badges, track donation progress, and enable social sharing.
